GLENARD U. PAGURAYAN

FULL STACK SOFTWARE DEVELOPER & IT SUPPORT SPECIALIST

Sto. Niño, Cagayan, PH 3525 • +63 955 799 7409 • glenard2308@gmail.com • glenn-it.github.io/Glenn_Portfolio • github.com/Glenn-IT • linkedin.com/in/glenard-pagurayan

PROFESSIONAL SUMMARY

Versatile and results-driven **Full Stack Software Developer** and **IT Support Specialist** with 3+ years of hands-on experience designing, developing, and deploying web, mobile, and desktop systems. Proven track record of delivering **30+ commercial and capstone software solutions** across LGUs, SMEs, and academic institutions, alongside 60+ open-source GitHub repositories. Combines rigorous enterprise software engineering (PHP/Laravel, MySQL, JavaScript, C#, Kotlin) with government-grade IT infrastructure support, network administration, and hardware troubleshooting (COMELEC Region 2, DENR-EMB Region 2). Holder of Google IT Support and Google AI Essentials professional credentials.

TECHNICAL SKILLS

Languages & Core: PHP (OOP / Core), JavaScript (ES6+), C#, Visual Basic .NET, Kotlin, C++, SQL, HTML5, CSS3

Frameworks & Web: Laravel, Bootstrap 5, RESTful APIs, AJAX, jQuery, Tailwind CSS, Next.js, Node.js

Databases & Mobile: MySQL, phpMyAdmin, Firebase (FCM, Realtime DB, Auth), MSSQL (SSMS), Android SDK (Java/Kotlin), Flutter

IT Support & Networks: PC Hardware Diagnostics, UTP Cabling, LAN/WAN Setup, TCP/IP, DNS, DHCP, Windows Server, Active Directory

Developer Utilities: Git, GitHub, VS Code, Visual Studio, XAMPP, Apache, Postman, DomPDF/TCPDF, Remote Desktop (TeamViewer)

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer — NeKo-SysDev **2022 – Present**

- Architected and developed 30+ full-stack web, desktop, and mobile systems for small businesses, municipal offices, and university researchers, maintaining a 100% defense and client delivery success rate.
- Engineered scalable database schemas, stored procedures, and secure RESTful backend APIs using PHP (OOP / Laravel) and MySQL for seamless data synchronization across web and Android interfaces.
- Implemented high-demand capabilities: automated SMS/Email notifications (PhilSMS), QR-code authentication, Google Maps GIS geolocation, and dynamic PDF reporting (DomPDF/TCPDF).

IT Support Specialist — Commission on Elections (COMELEC) Region 2 **July 2023 – Dec 2025**

- Delivered 24/7 technical and infrastructure support for workstations, laptops, vote-counting machines (VCM/ACM), network switches, and peripheral devices across electoral precincts, maintaining a 95% first-call resolution rate.
- Installed, validated, and debugged critical election-related software and statutory security patches under strict regulatory deadlines.
- Configured and troubleshot local area networks (LAN), resolved TCP/IP, DNS, and DHCP configuration issues, and ensured continuous connectivity with zero transmission downtime.

IT Support Intern & Administrative Assistant — DENR-EMB Region II **Jan 2023 – May 2023**

- Provided Tier 1 and Tier 2 IT support for 80+ regional staff workstations, resolving operating system errors, network printer sharing conflicts, and software application faults during a 500-hour practicum.
- Assembled, re-imaged, and configured desktop and laptop hardware, ensuring compliant OS deployments, antivirus updates, and driver configurations.
- Managed user account provisioning, email configuration, password resets, and IT asset inventory tracking in compliance with regional government IT standards.

FEATURED PROJECTS

PiatMove / PTODA Commuter Booking & Dispatch App **Kotlin, PHP REST API, MySQL, Google Maps, Firebase**

- Localized transit booking mobile app with live GPS tracking, automated fare calculation, and web admin dispatcher dashboard.

ODMIS — Online Disaster Management Information System **PHP, MySQL, Bootstrap 5, Google Maps API, Semaphore SMS**

- LGU disaster mitigation web portal featuring real-time evacuation center capacity tracking and automated SMS emergency broadcasts.

PCBCES — Plastic Bottle Coin Exchanger System **Arduino C++, Sensors, Coin Hopper, PHP, MySQL, Bootstrap**

- Automated reverse-vending machine verifying plastic bottle deposits, dispensing coins, and logging transactions with SMS bin-full alerts.

SDASFC — Smart Door Automation System for CICS **Arduino C++, RFID Module, PHP, MySQL, Python Serial Bridge**

- IoT access control system with RFID card reader, automated door unlocking, real-time tap logging, and student/faculty attendance tracking.

WBACFSPWI — Web-Based Automatic Solar Irrigation Controller **ESP32 / Arduino C++, PHP, MySQL, Soil Moisture & Relay Sensors**

- Solar-powered smart irrigation controller executing automated watering cycles with telemetry analytics and emergency shut-off controls.

EDUCATION & AWARDS

Bachelor of Science in Information Technology (BSIT) — Cagayan State University **2019 – 2023**

- **Honors & Awards:** Consistent Dean's Lister (All 4 Years) • Academic Distinction Award • Programmer of the Year (Class of 2023) • Best Capstone Project (Online Category) • IT Student Council Leadership Award

CERTIFICATIONS

- **Computer System Servicing NC II (320 Hrs)** — TESDA (PC Assembly, LAN Setup, Server Configuration, Diagnostics)
- **Google IT Support Professional Certificate** & **Google AI Essentials** — Coursera / Google
- **.NET Full Stack Foundation** (ASP.NET & C#) • **Cybersecurity for Everyone** • **PLDT InfoTeach Program (Phase 5)**
