GLENARD U. PAGURAYAN

FULL STACK SOFTWARE DEVELOPER & IT SUPPORT SPECIALIST

Sto. Niño, Cagayan, Philippines 3525 • +63 955 799 7409 • glenard2308@gmail.com • neko-sysdev.online • github.com/Glenn-IT • linkedin.com/in/pagurayan-glenard

PROFESSIONAL SUMMARY

Versatile and results-driven **Full Stack Software Developer** and **IT Support Specialist** with 3+ years of hands-on experience designing, developing, and deploying robust web, mobile, and desktop systems. Proven track record of delivering **30+ commercial and capstone software solutions** across LGUs, SMEs, and academic institutions, alongside 60+ open-source GitHub repositories. Combines rigorous enterprise software engineering (PHP/Laravel, MySQL, JavaScript, C#, Kotlin) with government-grade IT infrastructure support, network administration, and hardware troubleshooting (COMELEC Region 2, DENR-EMB Region 2). Certified in **TESDA Computer System Servicing NC II** and holder of Google IT Support and Google AI Essentials professional credentials.

TECHNICAL SKILLS

Languages: PHP (Core & OOP), JavaScript (ES6+), C#, Visual Basic .NET, Kotlin, C++, SQL, HTML5, CSS3

Frameworks & Web Tech: Laravel, Bootstrap 5, RESTful APIs, AJAX, jQuery, Tailwind CSS, Next.js, Node.js

Databases & Backend: MySQL, phpMyAdmin, Microsoft SQL Server (SSMS), Firebase (Realtime Database, FCM, Auth)

Mobile & IoT Development: Android SDK (Java/Kotlin), Flutter (Cross-platform), Arduino C++, RFID integration

IT Support & Networking: PC Assembly & Diagnostics, LAN/WAN Setup, TCP/IP, DNS, DHCP, UTP Crimping, Windows Server, Active Directory, Remote Desktop Support (TeamViewer, AnyDesk)

Developer Tools & Methods: Git, GitHub, VS Code, Visual Studio, XAMPP, Apache, Postman, DomPDF, FullCalendar JS, Agile/SDLC

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer & Co-Founder — 2022 – Present

NeKo-SysDev (Freelance Software Solutions) — *Sto. Niño, Cagayan, Philippines (Hybrid / Remote)*

- Architected and developed 30+ full-stack web, desktop, and mobile systems for small businesses, municipal offices, and university researchers, maintaining a 100% defense and client delivery success rate.
- Engineered scalable database schemas, stored procedures, and secure RESTful backend APIs using PHP (OOP / Laravel) and MySQL for seamless data synchronization across web and Android interfaces.
- Implemented high-demand capabilities: automated SMS/Email notifications (Semaphore/Twilio), QR-code authentication, Google Maps GIS geolocation, and dynamic PDF reporting (DomPDF/TCPDF).
- Conducted live end-to-end client demonstrations, remote server setup (XAMPP, Apache), software maintenance, and comprehensive system defense coaching for academic thesis teams.
- Authored technical documentation, user guides, data flow diagrams (DFD), entity-relationship diagrams (ERD), and system architecture specifications.

IT Support Specialist — July 2023 – Dec 2025

Commission on Elections (COMELEC) Region 2 — *Sto. Niño, Cagayan, Philippines*

- Delivered 24/7 technical and infrastructure support for workstations, laptops, vote-counting machines (VCM/ACM), network switches, and peripheral devices across electoral precincts, maintaining a 95% first-call resolution rate.
- Installed, validated, and debugged critical election-related software and statutory security patches under strict regulatory deadlines.
- Configured and troubleshot local area networks (LAN), resolved TCP/IP, DNS, and DHCP configuration issues, and ensured continuous connectivity with zero transmission downtime.
- Administered user accounts, role-based access permissions, and authentication credentials for election staff while executing verified scheduled backups of confidential voter data.
- Conducted practical user training and technical walkthroughs for electoral board members on system operation and emergency contingency procedures.

IT Support Intern & Administrative Assistant **January 2023 – May 2023**

Environmental Management Bureau (DENR-EMB Region II) *Tuguegarao City, Cagayan, Philippines*

- Provided Tier 1 and Tier 2 IT support for 80+ regional staff workstations, resolving operating system errors, network printer sharing conflicts, and software application faults during a 500-hour practicum.
- Assembled, re-imaged, and configured desktop and laptop hardware, ensuring compliant OS deployments, antivirus updates, and driver configurations.
- Managed user account provisioning, email configuration, password resets, and IT asset inventory tracking in compliance with regional government IT standards.

FEATURED PROJECTS & PORTFOLIO

PiatMove / PTODA Commuter Booking & Dispatch System **2026**

Technologies: Kotlin (Android SDK), PHP REST API, MySQL, Google Maps API, Firebase Cloud Messaging

- Built a localized on-demand transport booking mobile application for commuters and tricycle drivers in Piat, Cagayan, with live GPS route mapping and automated fare calculation.
- Engineered a centralized PHP web admin dashboard for real-time ride tracking, driver dispatching, fare matrix auditing, and analytics.

ODMIS — Online Disaster Management Information System **2026**

Technologies: PHP, MySQL, Bootstrap 5, Google Maps API, Semaphore SMS Gateway

- Developed a web-based disaster response platform for municipal LGUs featuring real-time evacuation center capacity tracking and GIS mapping.
- Integrated automated SMS emergency alert broadcasts to registered community residents during typhoons and calamity alerts.

OMASORR — Online Medical Appointment System (RHU Rizal) **2026**

Technologies: PHP (OOP / Laravel), MySQL, Bootstrap 5, FullCalendar JS, SMS/Email API

- Automated patient scheduling and electronic consultation bookings for Rural Health Units (RHU), reducing walk-in wait times by over 40%.
- Implemented automated SMS and email appointment reminders, doctor schedule slot management, and encrypted patient record tracking.

SDASFC — Smart Door Automation System for CICS **2026**

Technologies: Arduino C++, RFID Module, PHP, MySQL, Bootstrap, Python Serial Bridge

- Engineered an IoT physical access control system integrating an RFID card reader with an automated door latch and web-based monitoring portal.
- Provided real-time tap logging, grant/deny verification, and automated attendance reporting for university faculty and students.

IMASTS / SAIMS — Inventory Management & Sales Tracking System **2026**

Technologies: Visual Basic .NET, C#, MySQL / SQL Server, Barcode Scanner API

- Engineered a desktop POS and enterprise inventory solution with live barcode scanning, automated low-stock warnings, and transaction invoicing.
- Implemented dynamic sales analytics with visual reporting dashboards and automated daily/monthly PDF financial exports.

EDUCATION

Bachelor of Science in Information Technology (BSIT) **2019 – 2023**

Cagayan State University (CSU) *Cagayan, Philippines*

- **Academic Standing:** Consistent Dean's Lister (All 4 Years)
- **Honors & Awards:** Academic Distinction Award, Programmer of the Year (Class of 2023), Best Capstone Project (Online Category – Online Appointment System), IT Student Council Leadership Award

CERTIFICATIONS & LICENSES

- **Computer System Servicing NC II (320 Hours)** — Technical Education and Skills Development Authority (TESDA) [Certified in PC Assembly, LAN Setup, Windows/Linux Server Configuration, and Hardware Maintenance]
- **Google IT Support Professional Certificate** — Coursera (Troubleshooting, Networking, Operating Systems, System Administration, IT Security)
- **Google AI Essentials** — Google / Coursera
- **.NET Full Stack Foundation** — ASP.NET, C#, Data-driven web architectures
- **Cybersecurity for Everyone** — Governance, Risk Management & Network Defense
- **PLDT Home Fiber InfoTeach Outreach Program (Phase 5)** — Digital Literacy & Productivity
